AT A GLANCE

Welcome to Web Soft BD

Kazi Fakrul Latif
CEO
Web Soft BD

Web Soft BD is a leading privately held ICT company based in Dhaka, Bangladesh, committed to delivering innovative and high-impact technology solutions both locally and globally. Established in 2008, the company has achieved several national and international certifications and recognitions, including ISO 9001:2015, ISO/ IEC 27001:2022, CMMI Level 3, Climate Data Analysis and Downscaling-APN-Nepal, B-MEET-Japan, Bangladesh Computer Samity (BCS), Bangladesh Association of Software & Information Services (BASIS) and others. Founded by a team of visionary professionals, Web Soft BD was built with a clear mission: To provide cutting-edge Information and Communication Technology (ICT) solutions that address real-world challenges and drive sustainable development. With over 2,000+ successful projects delivered worldwide. Web Soft BD has demonstrated its capability across diverse sectors. The company is currently playing a key role in the implementation of internationally funded initiatives, including projects supported by the World Bank and JICA. One of its flagship contributions is to the "Agro-Meteorological Information Systems Development Project", implemented in collaboration with major government institutions such as Bangladesh Meteorological Department (BMD), Bangladesh Water Development Board (BWDB), and Department of Agricultural Extension (DAE), Ministry of Agriculture.

Under the World Bank-funded project "Agro-Meteorological Information Systems Development Project, Component-C of Bangladesh Weather and climate services Regional projects", in the Department of Agricultural Extension (DAE), Ministry of Agriculture (MoA), Web Soft BD successfully developed the Bangladesh Agro-Meteorological Information System (BAMIS) Portal: https://www.bamis.gov.bd/. This dynamic and user-friendly platform delivers critical climate and weather information directly to farmers and agricultural stakeholders across Bangladesh. By integrating real time data and actionable insights, BAMIS empowers users to make informed decisions, improving productivity and resilience in agriculture. The platform has received widespread recognition and appreciation from national and international organizations for its significant impact on farmers' livelihoods.

Web Soft BD has also developed and successfully operationalized advanced systems for key government agencies in Bangladesh, demonstrating its strong technical expertise and commitment to innovation.

For the Bangladesh Meteorological Department (BMD), the company has delivered a comprehensive suite of solutions, including interactive web portals and mobile applications that enhance accessibility and user engagement. In addition, Web Soft BD has implemented automated weather data dissemination systems to ensure timely and accurate information delivery. The company has also developed sophisticated meteorological data analysis and assessment tools, along with Earthquake Apps and other ICT services. (www.bmd.gov.bd)

Similarly, for the Bangladesh Water Development Board (BWDB), Web Soft BD has designed and implemented advanced hydrological forecasting systems. These include solutions for flood and sediment prediction, riverbank erosion monitoring, and forecasting of drought and salinity intrusion. The company has also developed groundwater and surface water outlook systems, enabling better resource management. All these capabilities are supported by upgraded web platforms that provide real time data visualization and early warning services, significantly enhancing decision making and preparedness. (www.hifm.bwdb.gov.bd)

Expanding beyond, the company continues to drive innovation through impactful projects such as the I-Soil initiative with the Rural Development Academy (RDA), which leverages IoT and data science to combat climate induced soil degradation and fertility loss. Additional achievements include the development of a digital Technical Journal platform for the River Research Institute (RRI) and a Financial Management System (FMS) for the Cox's Bazar Development Authority (CoxDA). Demonstrating the company's versatility in delivering both research focused and enterprise grade solutions.

Moreover, Web Soft BD has large experience in system development & Consultancy in others sector, like financial, real estate, garments, agriculture etc.

Building on its proven expertise and strong foundation, Web Soft BD is now ready to expand its services globally. The company is eager to collaborate with governments and international organizations worldwide to design, develop, upgrade, and maintain advanced ICT and climate service systems especially in regions where such capabilities are still developing. With a highly skilled team specializing in Agriculture, Meteorology, Climate, Soil, Computer Science, ICT, etc. Web Soft BD is fully equipped to deliver reliable, scalable, and impactful solutions tailored to diverse needs.

Web Soft BD stands ready to take on new challenges and deliver excellence with unwavering commitment. The company welcomes opportunities to contribute to transformative projects worldwide and is confident in its ability to exceed expectations.

Be a partner with Web Soft BD and power the future with intelligent technology solutions.
